

# The Concept **EXCAVATOR BLADE SKIP**

The Excavator Blade Skip is for moving materials, tools, attachments or muck around site. This is transported by excavators that have a blade or larger excavators that can lift the skip using the excavator bucket.

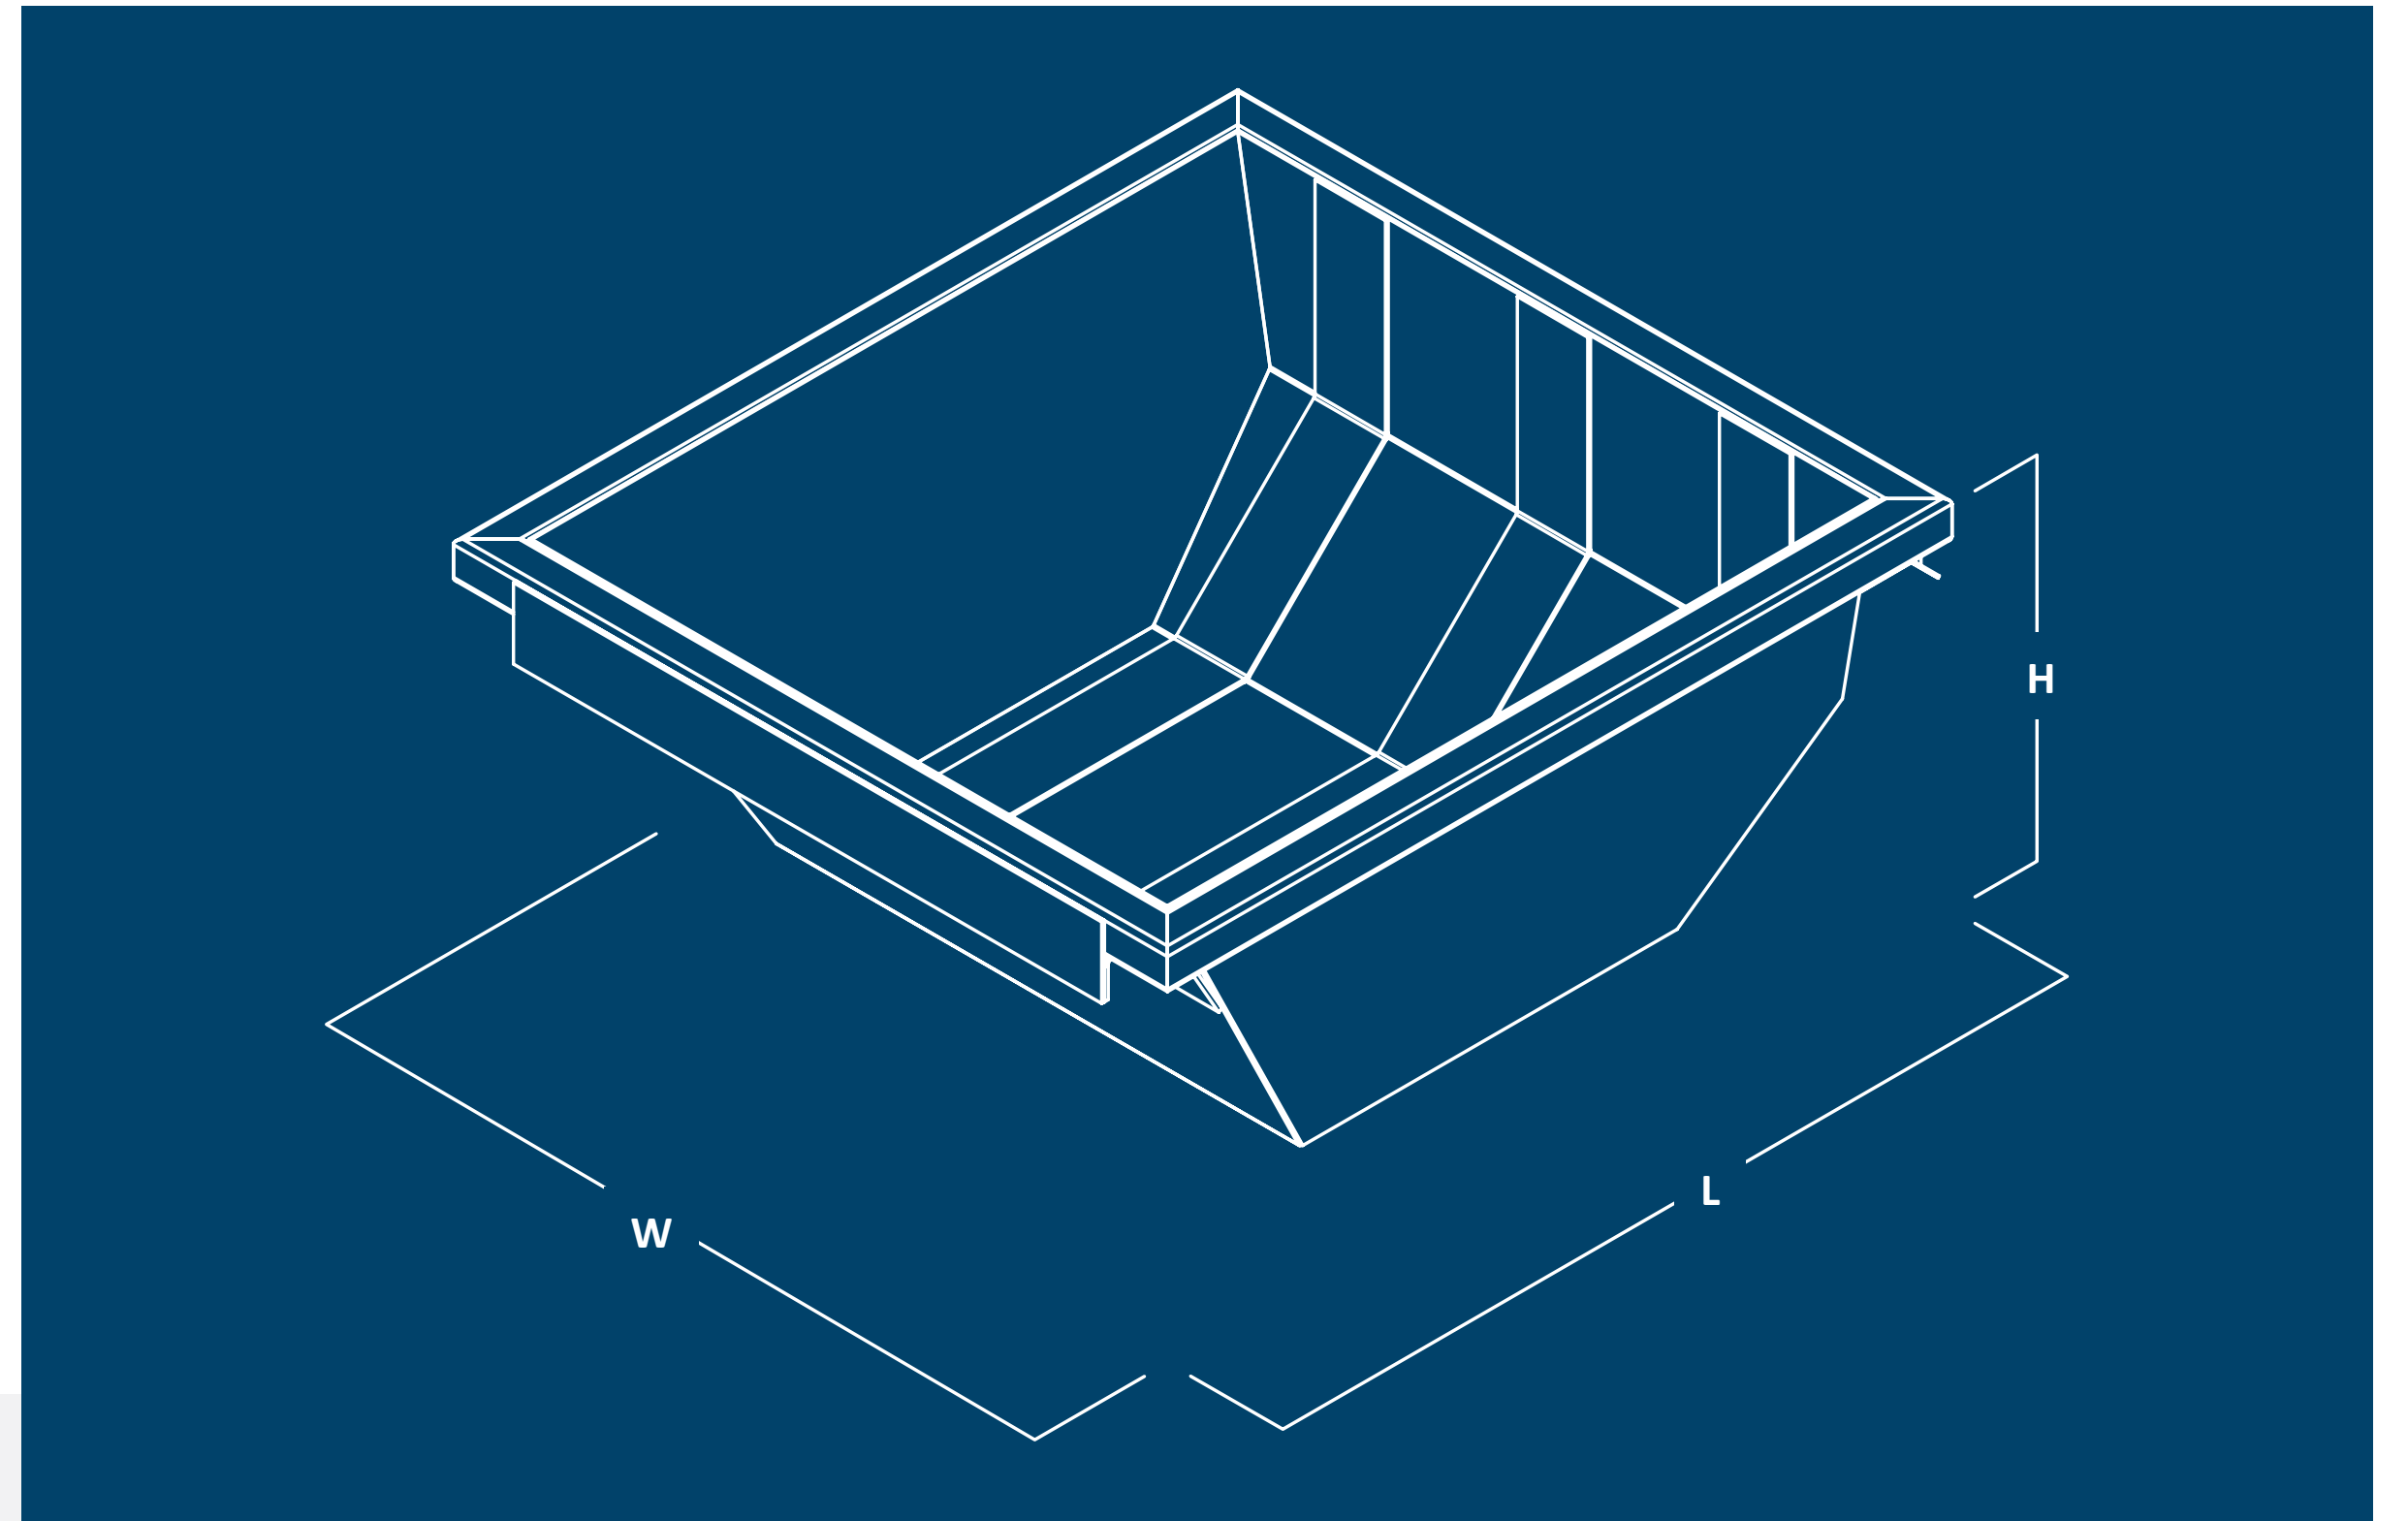

## KEY FEATURES

- Simple, robust design.
- Ideal for moving pea shingle, sand.
- Compatible with different size machines on site.
- Large capacity – 1000 litres / 2000kg Working Load Limit.
