TECHNICAL DATA SHEET

TRACK MATS

INTRODUCTION

OVERVIEW

Conquip Track Mats are designed to provide safe and reliable access for plant, vehicles, and personnel across soft, wet, or unstable ground conditions, commonly encountered on construction sites.

Manufactured from durable, high-strength plastic with an anti-skid surface, these ground protection mats distribute loads over a larger surface area, reducing ground pressure and improving traction. This helps prevent vehicles from becoming bogged down, minimises rutting, and reduces ground damage, particularly during adverse weather conditions.

Multiple mats can be bolted together with connector plates to cover large areas and secured to the surface with robust steel anchors.

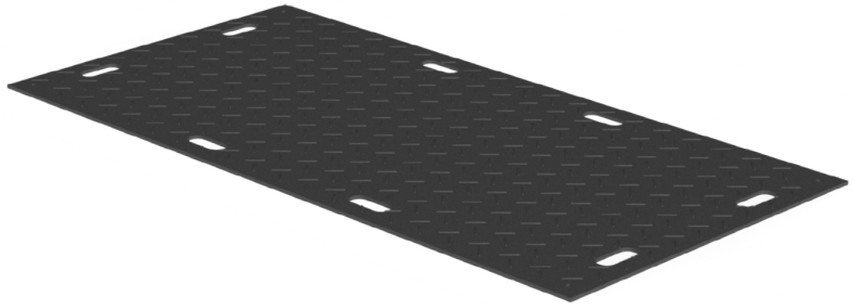

KEY BENEFITS

- Durable, sustainable material that reduces environmental impact.
- Supports loads up to 80 tonnes, depending on ground conditions, making these mats suitable for heavy plant, vehicles and equipment.
- Lightweight design means they can be manually handled and installed by two operatives without relying on lifting equipment.
- Reversible high-traction surface provides excellent grip for vehicles and personnel in wet or uneven conditions.
- Creates stable access routes that withstand demanding site conditions and repeated use.
- Cost-effective reusable solution which reduces replacement costs.
- Protects existing ground surfaces, minimising rutting, surface damage and post-project restoration costs.

PRODUCT INFORMATION

SPECIFICATION

TRACK MATS

CONNECTOR PLATE

STEEL ANCHOR

CODE	TYPE	LENGTH (mm)	WIDTH (mm)	HEIGHT (mm)	WEIGHT (kg)	WEIGHT LOADING* (tonnes)
SS490-02880	Track Mat	2400	1200	12	38	80
SS490AB	Connector Plate	184	184	12	0.5	-
SS490AA	Steel Anchor	305	64	-	1	-

*Weight Loading can vary depending on ground conditions. Our Track Mats are designed to spread the load rather than bear it but they can take a load capacity of up to 80 tonnes.
